DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-2, drawn to a method of potentiating an N-type Ca⁺⁺ channel activity, classified in class 514, subclasses 252.12+.
 - II. Claims 1-2, drawn to a method of treating brain disorders, classified in class 514, subclasses 252.12+.
 - III. Claims 9-14, drawn to a method of screening, classified in class 436, subclass 149+.

Note that claims 15-20 have improper multiple claim dependency accordingly they were not included in the restriction requirement.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II and III are each unrelated. Inventions are unrelated if it can be shown that they have different modes of operation, different functions, or different effects. In the instant case the different inventions have different functions and modes of operation, for instance the prior art search for the invention of group III is distinct from the invention of group II.

Art Unit: 1614

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Claims 3, 4 and 6 are generic to a plurality of disclosed patentably distinct species comprising the litany of brain disorders. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

5. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. A telephone call to the attorney is not required where: 1) the restriction requirement is complex, 2) the application is being prosecuted pro se, or 3) the examiner knows from past experience that a telephone election will not be made, see MPEP Sect. 812.01.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

Art Unit: 1614

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to D. C. Jones whose telephone number is (703) 308-4634.
